EXPERIENCE

2B Creative, UK — Frontend Developer

JUNE 2022 - PRESENT

- Performance Optimization of a Next.js website - Devised a way to render markdown serverside and replace several libraries with lighter-weight alternatives, reducing bundle size by more than 60kb resulting in a faster loading experience for users.
- Accessibility testing and optimization with Accessibility Insight Extension bring the site to a 98 Google Lighthouse accessibility score.

BrightScout, US — Frontend Developer

AUGUST 2021 - JUNE 2022

- Created and integrated GatsbyJS websites with headless CMS like Sanity and Contentful to facilitate non-technical content creation and editing.
- Implement proper SEO strategies including autogeneration of Opengraph images and optimized performance to attain an average of 95 Google lighthouse scores.
- Enforced typesafe and consistent codebase style using Typescript, Prettier, and ESLint and ensure the codebase follows industry best practices.

Audal Labs, Australia — Frontend Developer

OCTOBER 2021 - FEBRUARY 2022

- Developed a Babel Plugin that transformed Chakra UI Starred plugin to normal imports so the codebase has a great developer experience while not neglecting performance.
- Collaborated in the development and maintenance of a range of NextJS and Gatsby projects including E-Commerce sites.

Freelance Frontend Developer

MAY 2020 - PRESENT

- Built, and fixed issues on React and 11ty websites for clients.
