Work Experience

JUNE 2022 - PRESENT

2B Creative, UK – Frontend Developer (Freelance)

- Performance Optimization of a Next.js website - Devised a way to render markdown serverside and replace several libraries with lighter weight alternatives, reducing bundle size by more than 60kb resulting in a faster loading experience for users.
- Accessibility testing and optimization with Accessibility Insight Extension bring the site to a 98 Google Lighthouse accessibility score.

AUGUST 2021 - JUNE 2022

BrightScout, US – Frontend Developer (Contract)

- Built and maintained several client marketing websites using React and Gatsby for performance and SEO optimization.
- Integrated websites with headless CMS like Sanity and Contentful to facilitate non-technical creating and editing of content.
- Implement proper SEO strategies including autogeneration of Opengraph images.
- These websites rate 93% average on Google's PageSpeed insight.
- Enforced typesafe and consistent codebase style using Typescript, Prettier, and Eslint.
- Ensured websites complied with industry best practices.

OCTOBER 2021 - FEBRUARY 2022

Audal Labs, Australia – Frontend Developer (Contract)

- Developed a Babel Plugin that stripped-down Chakra UI bundle size by 20%
- Assisted in the development and maintaining of a range of frontend projects including an E-Commerce site.
- Led troubleshooting and fixing of several bugs in the development lifecycle.
- Mentored by and rapidly took feedback from the team lead.
- Used React, Gatsby, NextJS, GraphQL, Redux, Chakra UI, MUI, and headless WordPress among others.

MAY 2020 - JULY 2021

Upwork – Frontend Developer (Freelance)

- Built, maintained, and fixed issues with several front-end projects for clients.
- Made use of React, Javascript, Sass, Bootstrap, Prismic CMS, Eleventy,
- Communicated effectively with clients on project progress.
- Handoff projects with clear documentation in the Readme.
